

FIRST ON SCENE

NEW! **PLUG KIT**

For all first responders who are first on an accident scene, this new Kit has what you need to stop a leak fast. Designed primarily for fuel leaks, this kit contains simple proven items such as wooden plugs with rubber mallet, four sticks of epoxy repair putty, five all-purpose absorbent pads, a can of Plug N Dike, one of our football plugs, and two of our golf ball plugs. All come in a handy kit, compact enough to fit on every engine in your department, or staged near fuel storage tanks in plants, airports, etc...

Don't get caught out there without

Golfball successfully plugged these two leaks.

Multiple Footballs/Golfballs can be used in combination depending on size of hole.
